Urgent request from UN Women and UNFPA

Concern that some shelter occupants are without adequate hygiene facilities.

UN Women and UNFPA have made an urgent request for the most up-to-date data on the current male and female population residing in shelters within the affected areas. This information is essential for the efficient distribution of dignity hygiene kits. Alongside this data, and as we will need to present this to our stakeholders, we kindly request the creation of an infographic (rather than a map).

Additionally, we would greatly appreciate any insights regarding the specific needs of these sheltered individuals.

Your collaboration in providing this information will greatly assist our ongoing efforts to address the needs of those impacted.

Thank you for your swift response and dedication to this critical cause.
