

October 2023 - Saint Kitts and Nevis

Mapping in Disaster Management

Disaster and Risk Management Lifecycle

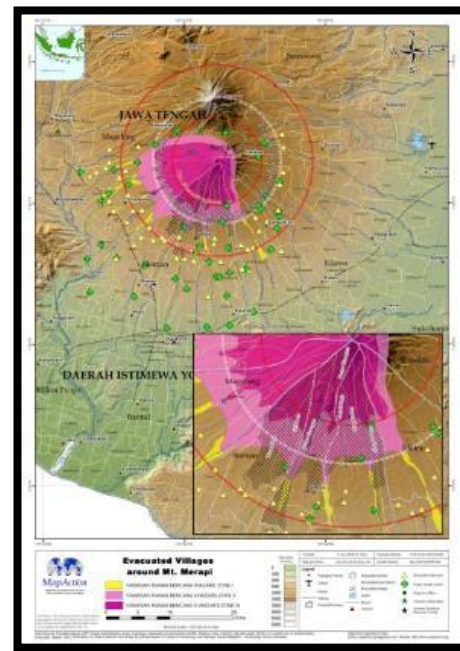

Disaster Risk Management Lifecycle

- Mapping and spatial data used in
 - Disaster Risk Reduction
 - Hazard and Risk Mapping
 - Contingency Planning
 - Critical Infrastructure Asset Management
 - Predictive Analysis and Early Warning
 - Donor relations

- “Where?”

Mapping as part of the process

Mapping or Spatial Data by themselves are not going to provide the mitigation and preparedness. They are part of the process.

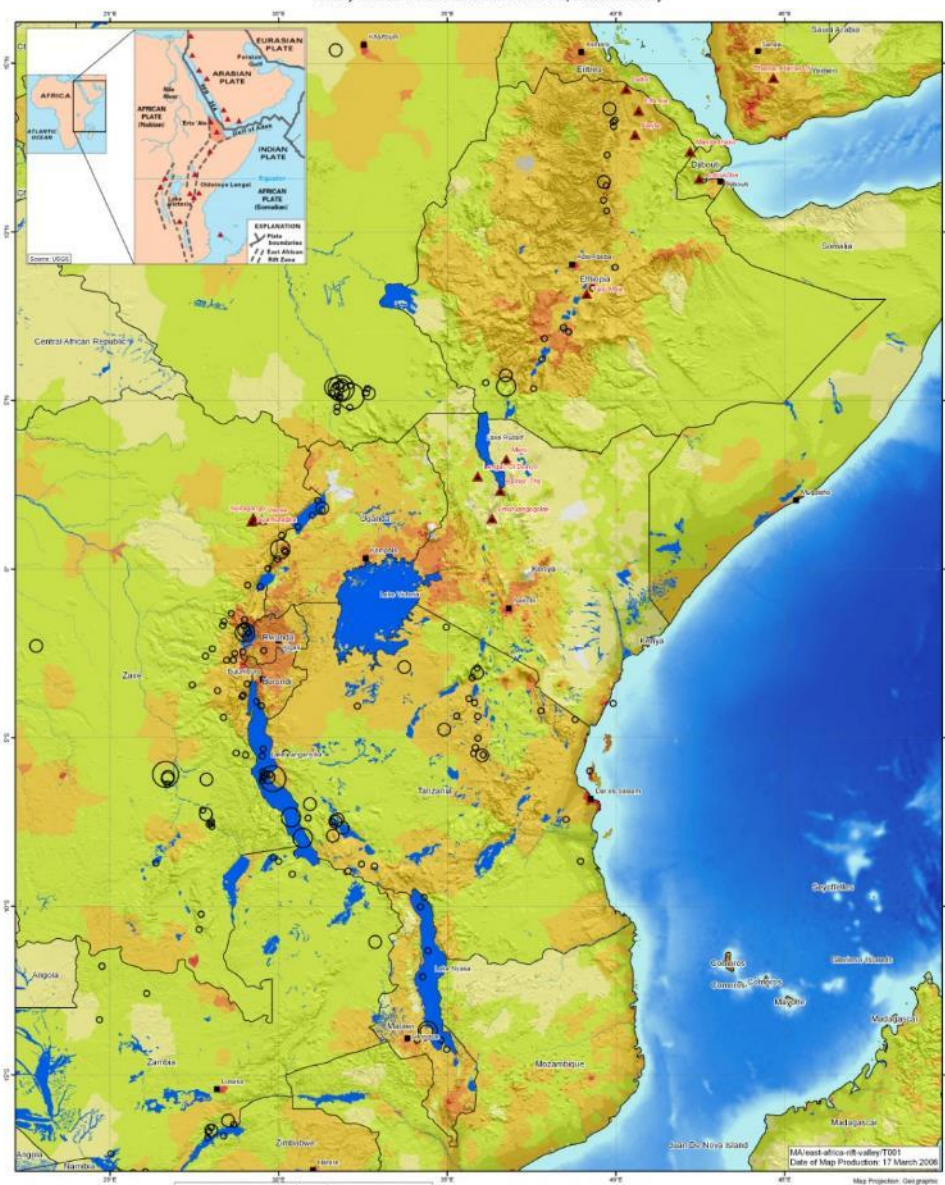

Early warning / risk assessment

Maps are a good way of showing underlying risks in a particular area. This map shows earthquake and volcanic activity in East Africa since the 1970s, alongside locations of settlements.

It thereby aims to highlight areas where people are at potentially higher risks from these events.

East African Rift Valley
History of Seismic Events in relation to Population Density

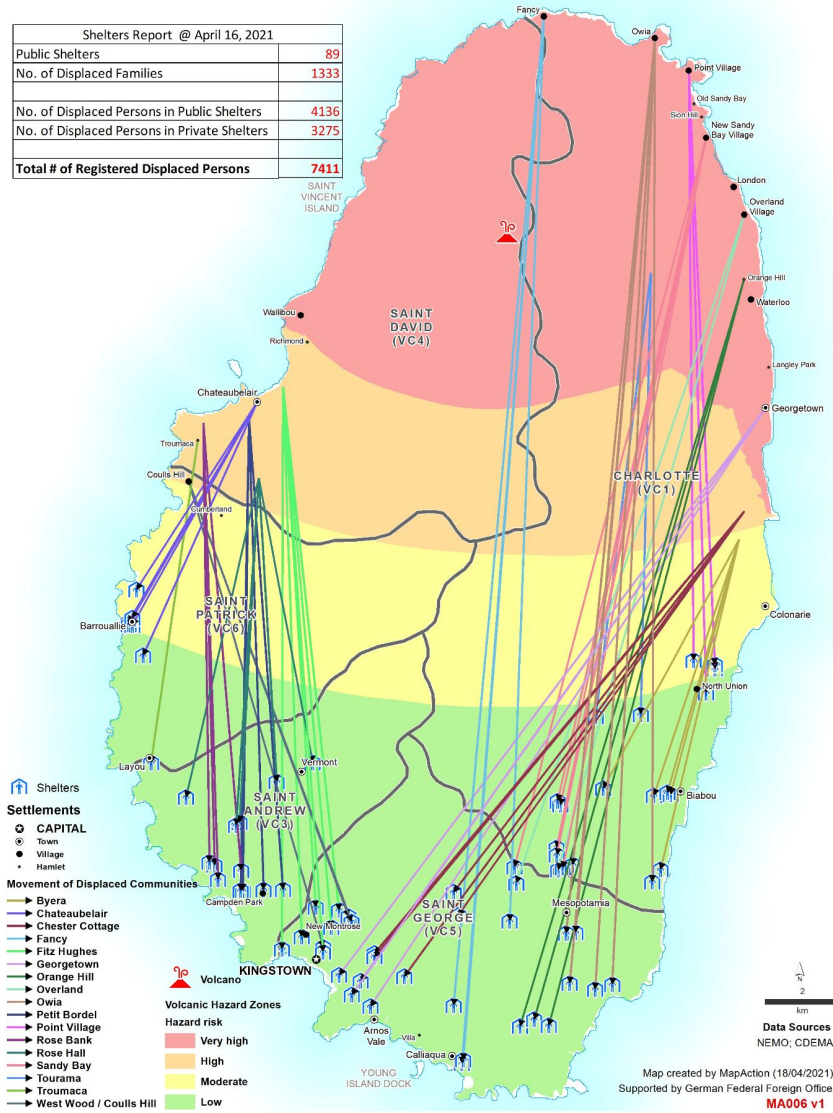

Evacuation Planning

- Evacuation map
- La Soufriere active volcano
- Settlements and hazards
- Shows scale of evacuation

Shelters Report @ April 16, 2021

Public Shelters	89
No. of Displaced Families	1333
No. of Displaced Persons in Public Shelters	4136
No. of Displaced Persons in Private Shelters	3275
Total # of Registered Displaced Persons	7411

Advocacy / Donor Relations

Response and Recovery

Next section of Disaster Management Cycle:

- Response and Recovery
- Two crucial stages after the disaster event
- Part of humanitarian activities
- "Where?" question important

“Where” questions

In emergencies... many questions about “Where?”

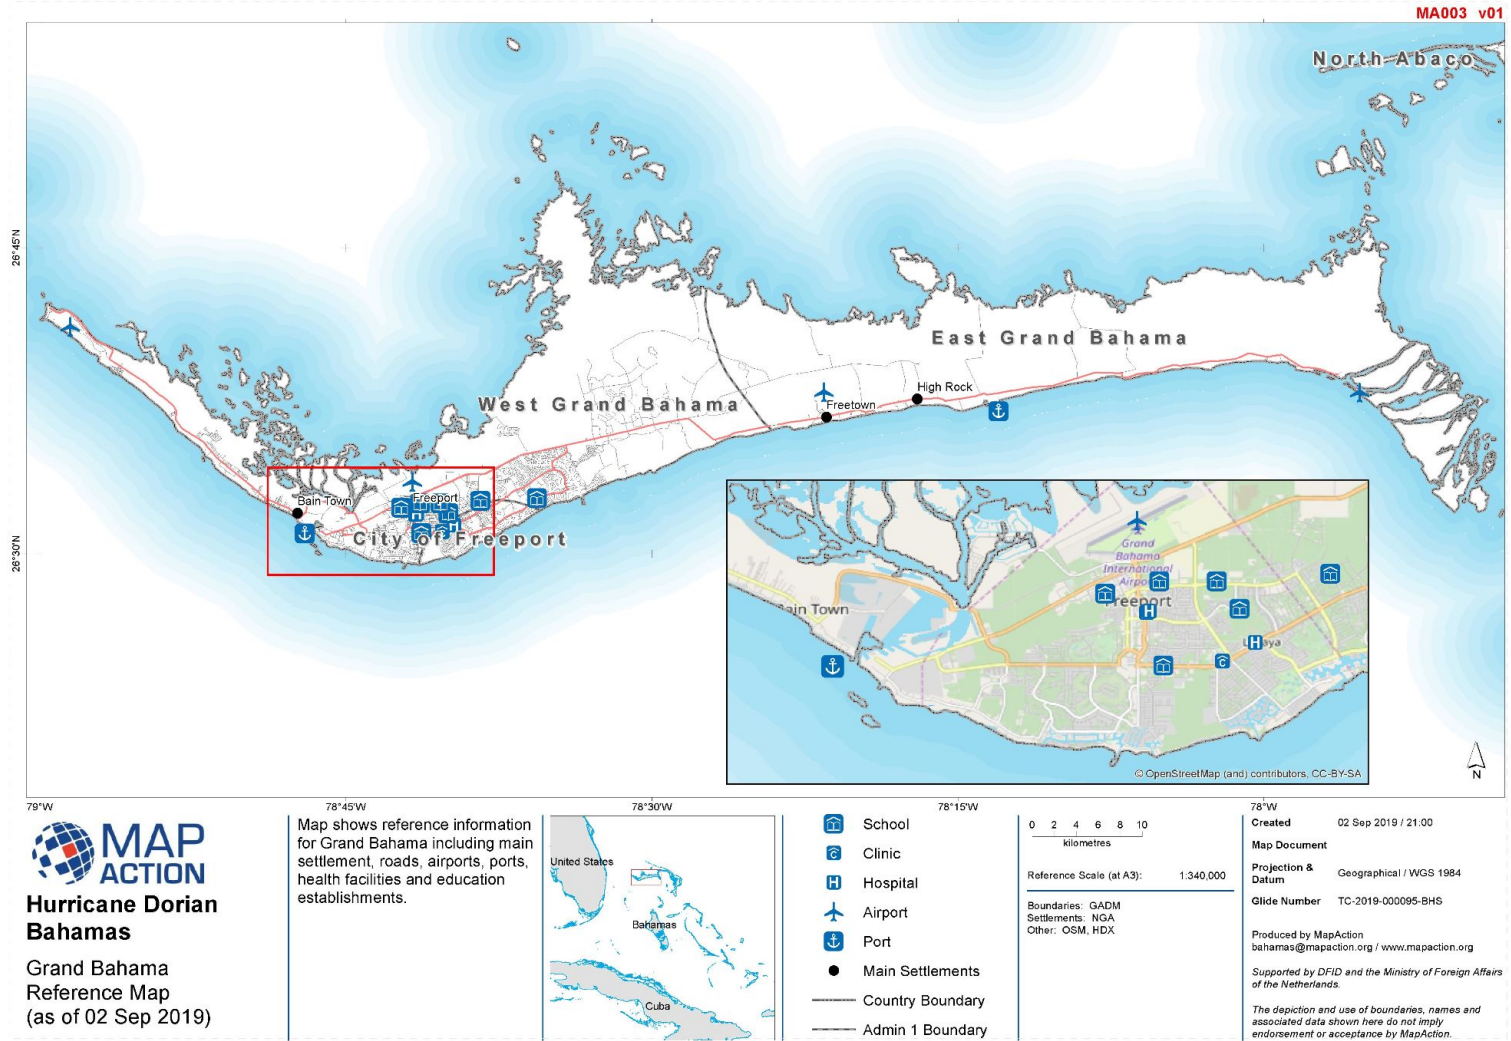

- What is **extent of affected area**?
- Where are **people with specific needs**?
- Where have people **moved to**?
- Where are required **resources**?
- What logistics **infrastructure**?
- **Who** is doing **What, Where** (3W)

Applications of Maps and Geospatial Analysis

Applications of maps in humanitarian emergencies:

- Early warning and alerting
- Predictive Analysis & affected areas
- Needs assessment
- Safety, security and protection
- Coordination & Relief programming
- Logistics operations planning
- Monitoring and evaluation
- Advocacy and donor relations

Reference Maps

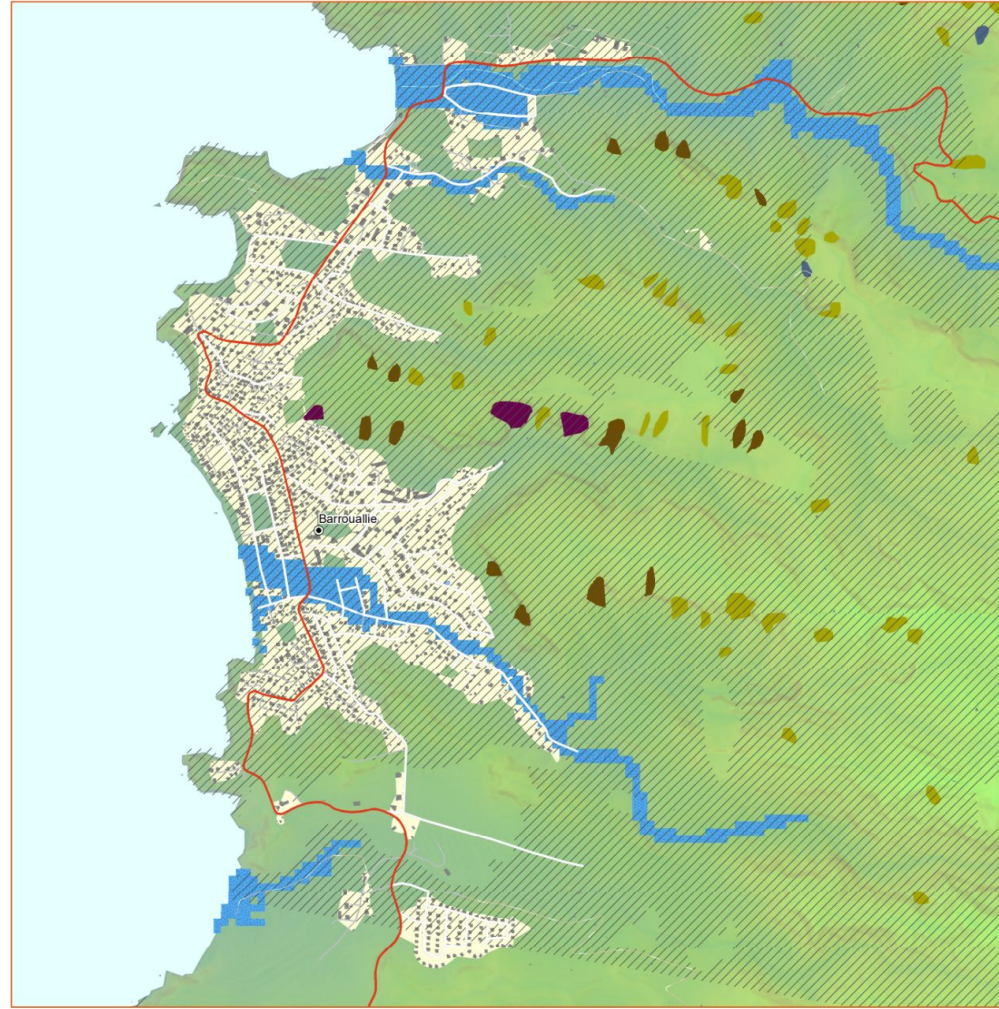

Baseline Data

MAP ACTION St Vincent and the Grenadines: La Soufrière volcano
Multi-hazard risks of Barrouallie, Saint Vincent (as at 4 May 2021)

Map showing possible impacts of a modelled volcanic hazards (specifically landslides and possible routes for lahars) and hydrological hazard (specifically flash flood). The modelled data were created before the eruptions of 2021 and the April 29, 2021 rainfall. However, the reports on impacts of the rainfall may coincide with the modelled data.

Map created by MapAction (04/05/2021)

Access and routes status

This map shows the status of roads in Saint Vincent after the volcanic eruption - where ash might be blocking roads or bridges have been damaged.

This can be crucial information early in a disaster as access can be critical to get resources to those most in need, or to evacuate people.

MA008 v1

Affected Population

The Bahamas: Hurricane Dorian

MA092 v3

Needs assessment and analysis - Abaco. Symbols represent the number of people in need following assessments up to 19th September 2019.

Supported by the German Federal Foreign Office and the Ministry of Foreign Affairs of the Netherlands.

The figures illustrated here represent the results of OCHA assessments up to 19th September 2019 and have been validated by the Government in Abaco.

Location	Total Popn (2010)	Remaining Popn	Popn in need	Source	Priority needs	Ongoing response
Cedar Harbour, Wood Cay, Mount Hope, Fox Town, Crown Haven	762	700	400	Community member (came from north of bridge), Team Rubicon, Northern Administrator	Early recovery (houses/bridge repair, WASH, fuel, shelter)	Bridge repair, WASH, generator, pump, shelter
Spanish Cay and all of Cooper's Town	676	450	300	Informed Elder, Northern Administrator	WASH, shelter, early recovery	Food, water, shelter, medical clinic repair (EMT - 10 clinicians total)
Hope Town / Elbow Cay	458	650	300	Deputy Counselor/Hope Town Fire & Rescue	Shelter, food, WASH for displaced from other areas	Tarps
The Farm	402	250	200	Team Rubicon, SOS International	Shelter, WASH, food, fuel, early recovery	Food, water, shelter
Sand Banks	333	150	150	OCHA, FAHO	WASH, food, shelter, fuel, early recovery	Food, water, shelter
Charlotte Sound, Little Harbour, Yellow Wood, Casuarina Point	363	200	150		Early recovery, fuel	
Marsh Harbour	1874	150	135	Community members, WFP	WASH, food, shelter, fuel, early recovery	Food, water, shelter
Treasure Cay (without Sand Banks)	854	150	100	Airport manager, Deputy Chairperson, Police inspector, business owner	WASH, food, shelter, fuel, early recovery	Food, water, shelter, health
Grape Tree and all of Blackwood	396	100	100	Community members, WFP, Northern Administrator	Health, WASH, telecom, fuel, food, early recovery	Food, water
Green Turtle Cay	595	306	92	Boat rental owner in Treasure Cay, Northern Administrator	Shelter, WASH, food, early recovery	Food, water, shelter
Fire Road	349	245	74	Northern Administrator	WASH, shelter, early recovery	
Dundas Town	2090	75	68	WFP	WASH, food, shelter, fuel, early recovery	Food, water, shelter
Murphy Town	1938	50	45	WFP	WASH, food, shelter, fuel, early recovery	Food, water, shelter
Moore's Island	593	100	30	Medic Corps	Water, food, health, fuel	
Grand Cay	383	250	25	Northern Administrator	Early recovery, fuel, telecomms, power	
Spring Cay	500	42	15	Pastor / local leader	Power, water	Tarps, shingles
The Mudd	1622	0	0	Community members		
The Pex	682	0	0	Community members		
Panons Cays, Lubbers Cay, Tilcoo Cay, Cornish Cay and Bridges Cay	18	5	0		Early recovery, fuel, telecomms, power	
Man of War Cay	215	65	0		Early recovery, fuel, telecomms, power	
Great Guana Cay and Scotland Cay	127	40	0	Deputy Counselor for Hope Town, Council Member for Guana Cay	Early recovery (repair houses, debris clearance), power	
Totals	8432	3978	2,184			

Note: South Abaco locations have been excluded because it is reported they are not in need of humanitarian assistance

Introduction to CDEMA and the Regional Response Mechanism (RRM)

CDEMA: who WE are...

The **Caribbean Disaster Emergency Management Agency (CDEMA)** is a regional **inter-governmental agency** responsible for disaster management in the **Caribbean Community (CARICOM)**. The Agency was **established in 1991** as the **Caribbean Disaster Emergency Response Agency (CDERA)** with the primary responsibility for the coordination of emergency response and relief efforts to Participating States impacted by hazards which exceed their capacity to manage. It **transitioned to CDEMA in 2009** to fully embrace the principles and practice of **Comprehensive Disaster Management (CDM)**.

Agreement Establishing CDEMA

There are 43 articles covering...

Legal Personality

Mandate

Governance:
Organs and
Function

Undertakings of
Participating
States

Facilitation and
Collaboration

Other Areas

Mandate of CDEMA

Mobilise and coordinate
disaster relief

Mitigate consequences of
disasters

Provide comprehensive
information on disasters

Encourage disaster loss
reduction and cooperative
arrangements and
mechanisms

Establish, enhance and
maintain adequate emergency
disaster response capabilities
among the Participating States

Governance Structure

The CDEMA Council

- Determines the policies of CDEMA
- Comprises the Heads of Gov'ts of the CDEMA PSs

The Management Committee of the Council

- Sub-committee of Council responsible for administrative oversight issues
- Permanent Secretaries responsible for disaster management

The Technical Advisory Committee

- Technical and programmatic advisory arm
- National Disaster Coordinators and reps of specialized regional organisations

The CDEMA Coordinating Unit

- Education, research and information
- Finance and administration
- Mitigation, preparedness and response

THE REGIONAL RESPONSE MECHANISM (RRM)

What is the RRM?

AIM

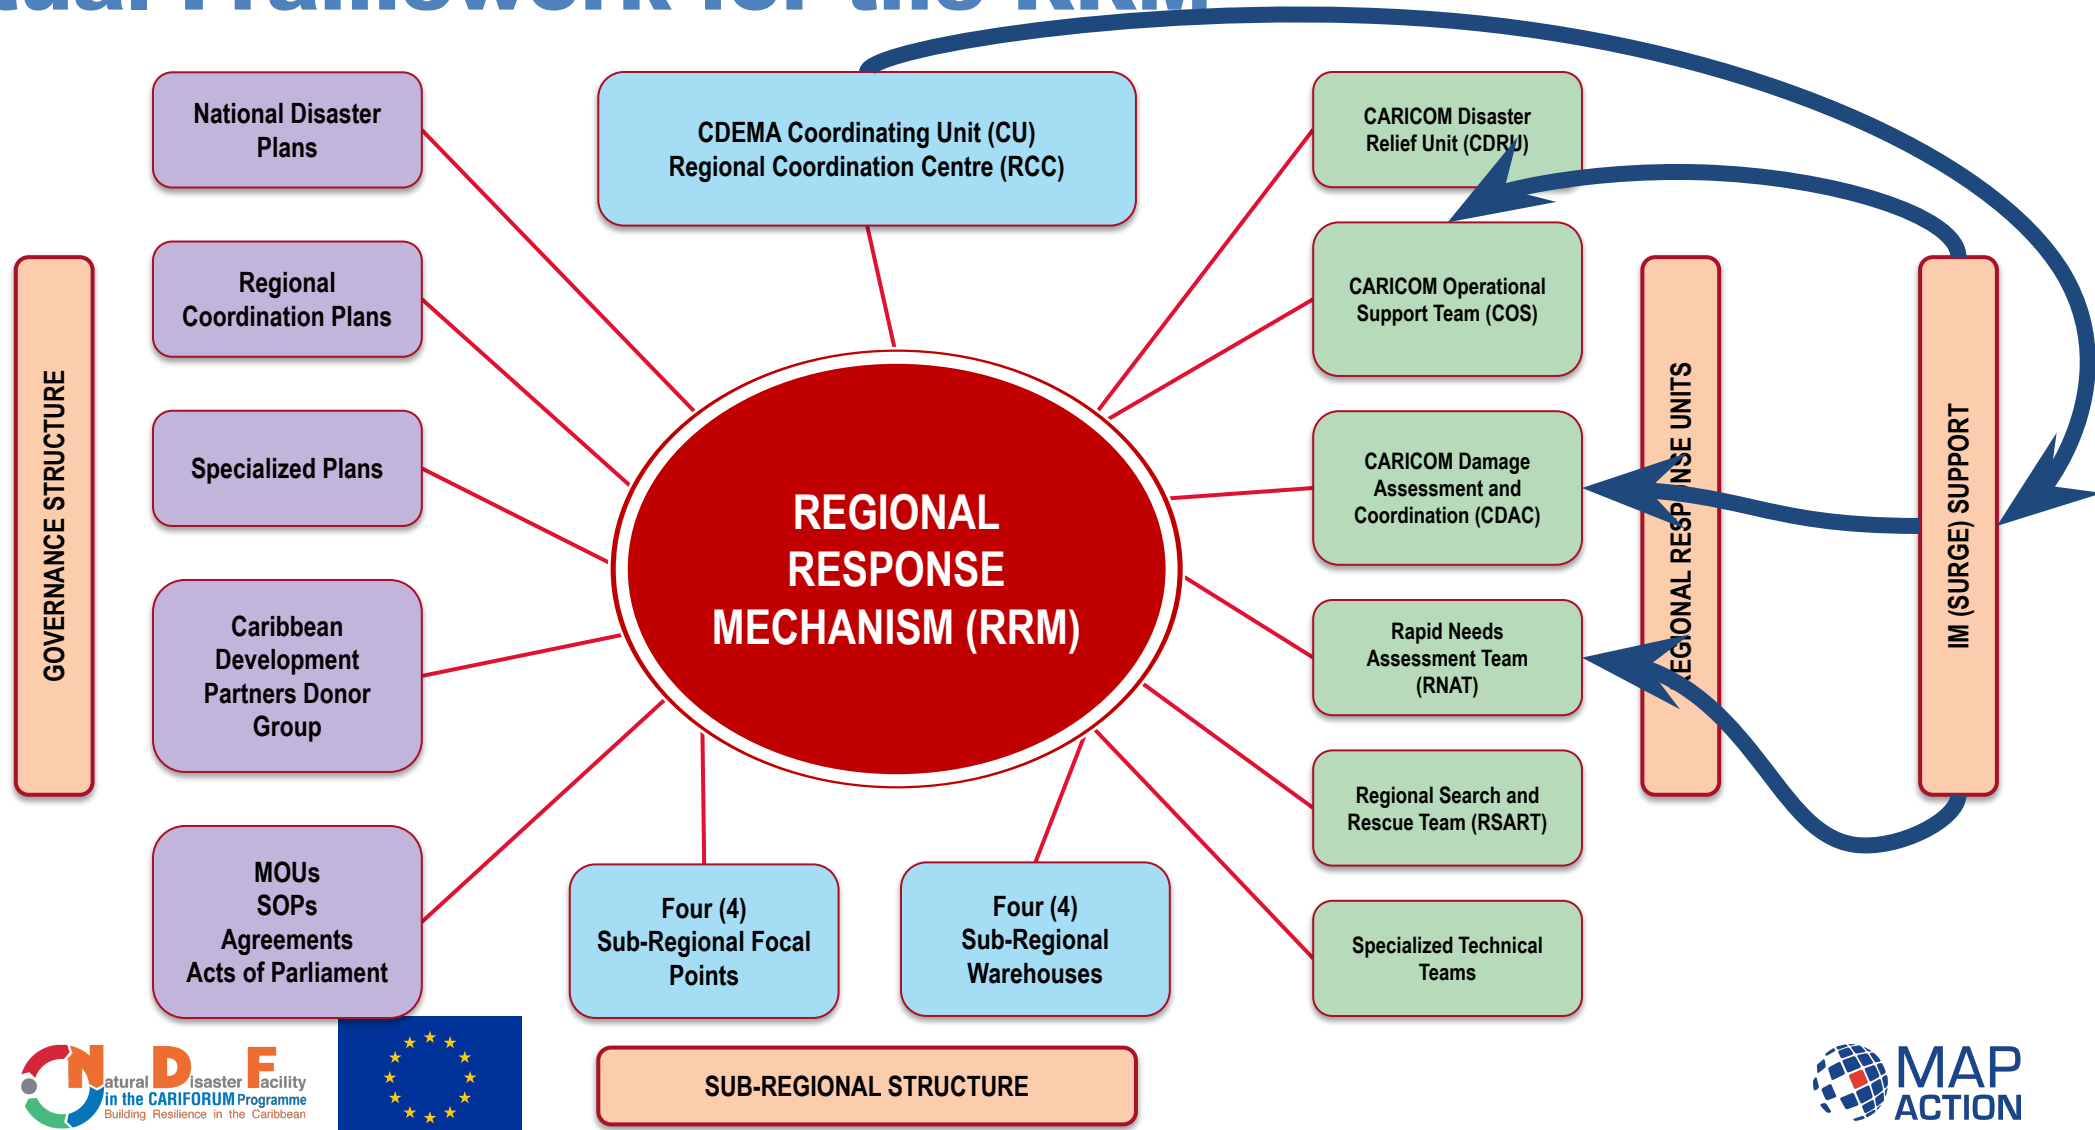

To provide effective and efficient coordinated disaster response support to CDEMA Participating States requiring regional and/or international assistance for their response to the consequences of an event based on regionally agreed Principles, Concept, and Realities.

PRINCIPLES

1. Respect for sovereignty
2. Regional solidarity
3. Compliance with international **Humanitarian Standards**: *Humanity, Impartiality, Neutrality, Independence*
4. Adherence to principles of partnership: *transparency, results-oriented, responsibility, complementarity*

Conceptual Framework for the RRM

CDEMA Operational Elements

Relief Management

- Establish relief mechanism – policy and structure for the event
- Advise the impacted State, and where possible support the development of the needs list
- Head the international and regional coordination for relief

Logistics

- Liaise with suppliers, transport networks, regional military, etc. to move relief supplies and personnel

Situational Overview

- Process data to inform:
 - Needs list,
 - Relief priorities,
 - Relief mechanism,
 - Situation reports
- Prepare information charts and graphs of data for communications cell
- Map the data received using pre-existing charts

Telecomms

- Maintain emergency telecommunication with the impacted PSs and others via HF, Satellite BGANs, etc.

Communications

- Advise impacted PS on the publication of the needs list
- Communicate relief policy and structure for the event to PSs, Donors, Regional and International Institutions, other interests, and the general public

Conclusion: The Full Cycle

Mapping is key to Disaster Management Lifecycle

- Some maps are used throughout in different forms
- Some particular to a section of the life cycle

Q - how does this help you in your own EOC operations?
